

ARTISTIC
TRIUMPH

Valmont Industries, Inc. is a leading producer and distributor of products for the infrastructure and agriculture markets.

The company began in 1946 when our founder, Robert B. Daugherty combined his \$5,000 savings and wholehearted belief that business could and should be done better. Since that modest start more than half a century ago, our company has grown to be an international leader in engineered products and services for infrastructure and water-conserving irrigation equipment for agriculture.

Valmont operates in five primary business segments: Engineered Support Structures (ESS), Utility Support Structures (USS), Energy & Mining, Irrigation & Coatings. Valmont (VMI) is listed on the NYSE. The company is present in 23 developed and developing countries, offering 27 brands from more than 90 facilities. International sales represent a significant portion of our revenues.

Valmont Structures in India is a wholly owned subsidiary company of Valmont Industries, Inc. We design, manufacture and supply poles categorized under three broad segments - Lighting, Telecom and Utility. We also manufacture Metal Beam Crash Barrier System, more commonly known as guardrails under the Highway Safety segment as well as lattice structures for Telecom and Utility. We are also exploring investment opportunities in the irrigation sector in India.

Valmont's employees are passionate about the products they make. We have built our reputation on a company-wide customer service, innovation and cost-effective solutions. Most importantly, we put our experience, expertise understanding of customer needs, technology and operational excellence into everything we design and manufacture. We pride ourselves on being people of integrity who always excel at delivering optimal results.

PASSION
We have a passion for our products, services and customers.

INTEGRITY
We operate with absolute integrity.

CONTINUOUS IMPROVEMENT
We strive for continuous improvement, removing waste everywhere with a true sense of urgency.

DELIVER RESULTS
We consistently deliver results.

DIVIO

With a vision to incorporate India's heritage into the products we manufacture, **DIVIO** was born. These cast iron structures stand for ethnicity, permanence and durability. And that is why Divio proves to be the ideal choice for city beautification projects.

FLORINA breaks the monotony of more classical arrangements. This noble & robust structure ranges from 2-6 metres in height with the arms blossoming in different directions and at varying heights. Whether you're looking to decorate parks, campuses or recreational areas, Florina is the perfect solution.

FLORINA

GRAPPA® is synonymous with discretion & conformism. Available in heights ranging from 8-12 metres, the structure is a perfect blend of elegance and strength. Unlike regular street light poles, these have surface-mounted fixtures, which makes them unique aesthetically and functionally.

GRAPPA®

JUHU

JUHU was conceptualised based on the location of the poles. Lining the shore of the famous beach in Mumbai, the 10 metre pole structures are fabricated with fibre-reinforced plastic (FRP) and a cloth is used for the sail while CRCA sheets are used to cover the base part of the boat-shaped structure.

BERRECHID®

RUKA®

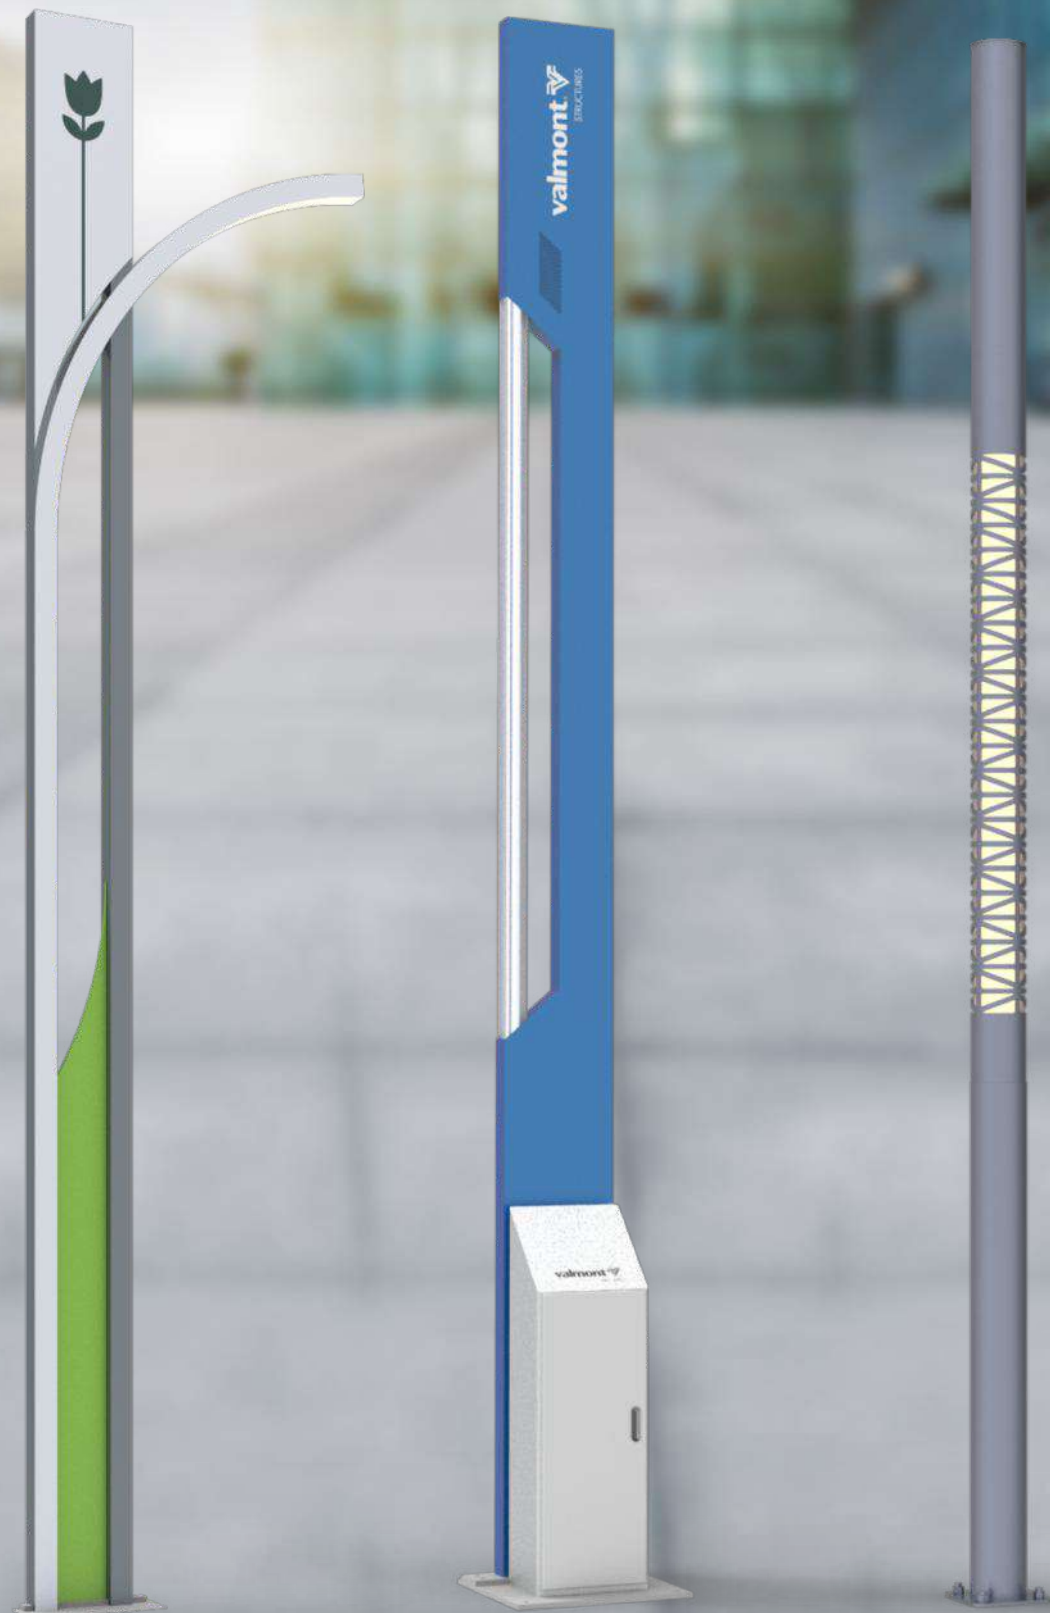

A product manufactured at our Tehomet plant in Finland, **RUKA**® is an elegant combination of wood & steel. The use of wood adds a multitude of shapes & possibilities to lighting poles. The excellent design characteristics & surface finishing options of wood result in countless product variations.

Inspired from a town in Morocco of the same name, **BERRECHID**® symbolises simplicity and functionality at its best. Available in combinations of both single and double cascade arms, this high grade steel structure is best suited for your urban expansion needs.

| MAKING YOUR STREETS BEAUTIFUL, ONE CITY AT A TIME

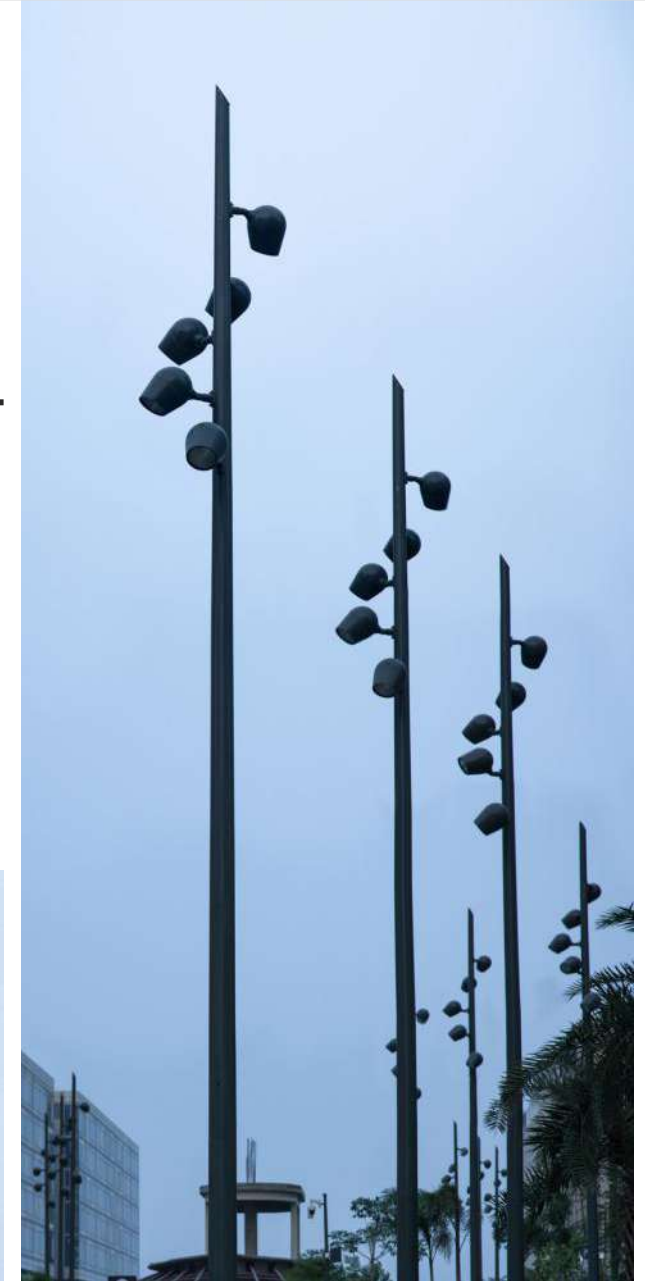

With our breadth of products, Valmont® Structures is unmatched in its ability to provide standard and decorative products. Whether you're lighting a residential neighbourhood or revitalizing streets in the city, Valmont® Structures offers a complete lighting solution with customised accessories.

Installation in Guntur, Hyderabad

Installation in Akola, Maharashtra

Installation at Delhi Aerocity

FUNCTIONAL BEAUTY AT ITS BEST

Decorative lighting is vital to urban redevelopment. It creates a distinctive sense of community, provides an upscale aesthetic and attract style-conscious shoppers to refurbished retail developments. Valmont® Structures offers a great variety of steel, cast iron, wood decorative lighting poles and lamp posts. Lighting designers, architects, city and transportation planners rely on our engineering expertise to create decorative light poles, lamp posts and accessories that mirror their distinct vision.

PROTEUS

These poles can be offered in Ductile Cast Iron Material as well which have service life more than steel and wood.

Poles are offered with decorative brackets made of Cast Iron. These poles can also be offered with LED Luminaire with different range of wattages.

HELIOS

IRIS

In house foundry for Cast Iron Castings helps to save time and also imparts strict control over the process. Patterns are made using CNC Pattern Making Machines.

3D printers are used for Advanced Modelling. Our main asset remains in flexibility in offering different solutions. Pattern Development is possible with Wood, Clay, POP, Fibre suiting the application and complexities involved. Solution available with channel network spread across the country.

Valmont India extends its range of decorative products to include Cast Iron Poles. Cast Iron Poles are manufactured as per IS 210.

Solution is offered from 2.5 meter to 4.0 meter. Any other custom height can also be offered based on customers need. Poles are given appropriate surface treatments like Sand Blasting and Shot Blasting.

Solution stands ideal for Tourist Destinations, Heritage Locations and Parks within any municipal limits.

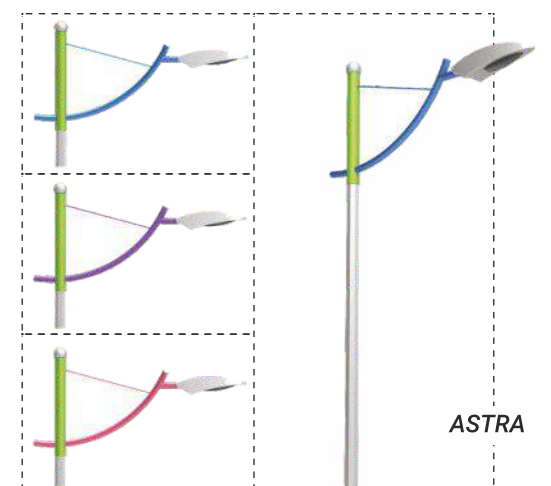

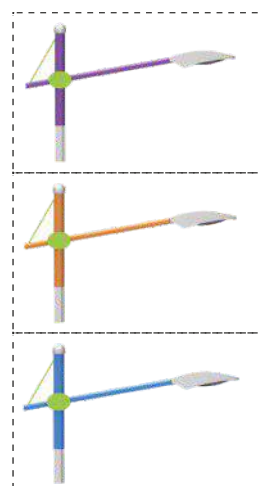

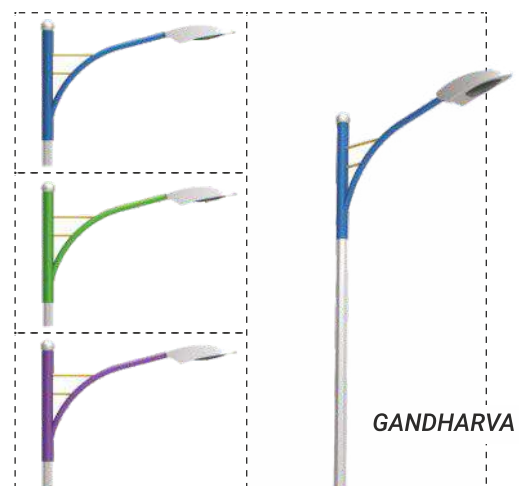

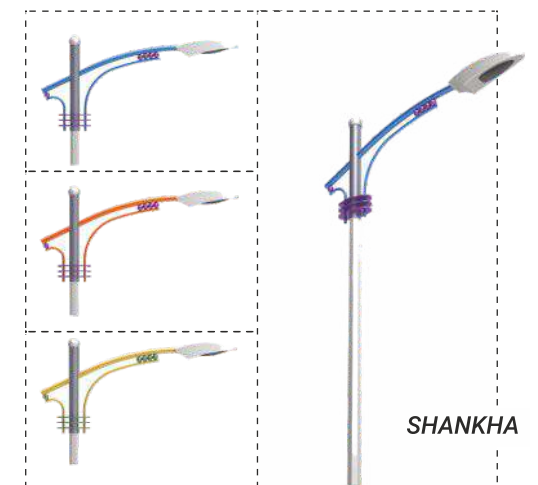

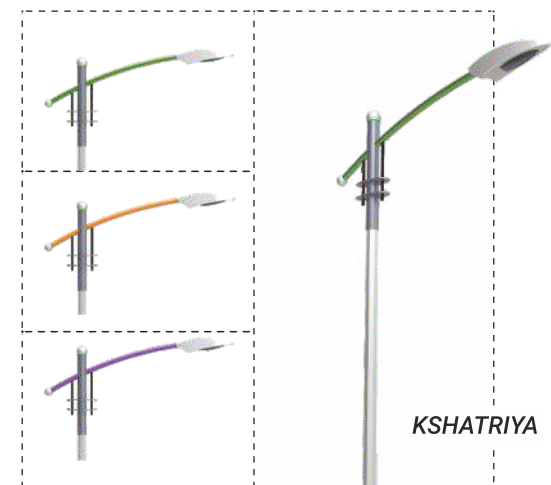

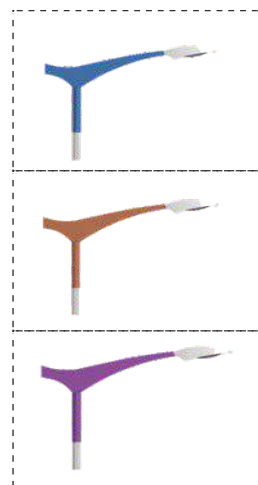

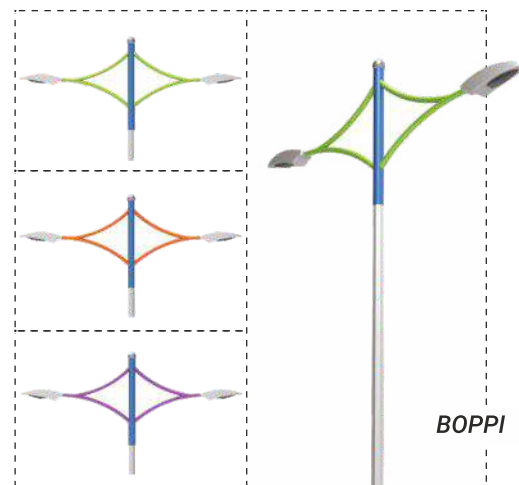

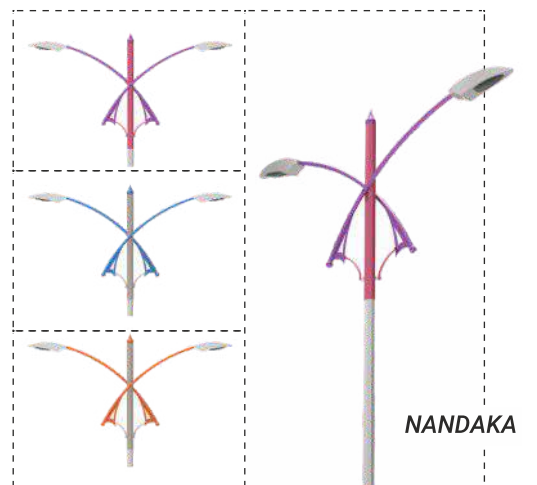

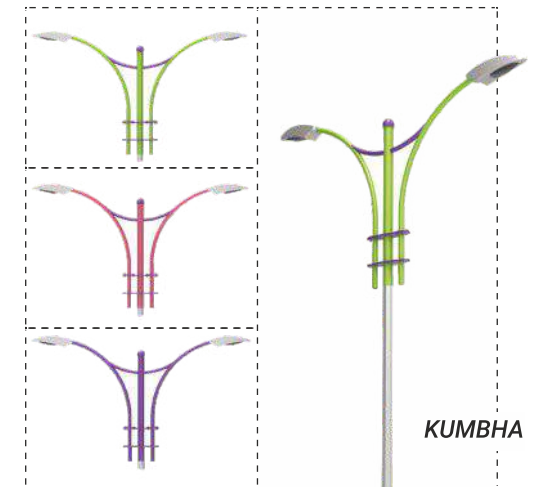

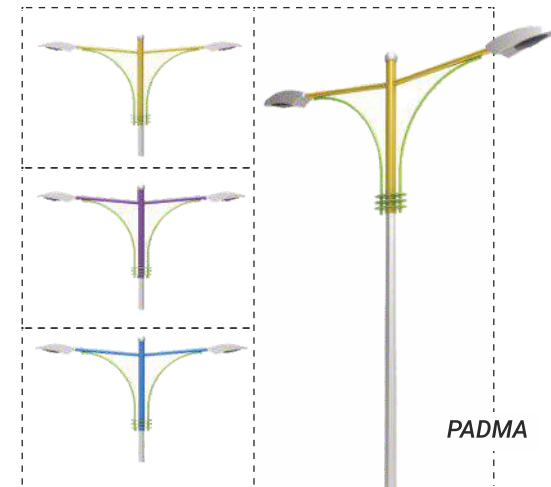

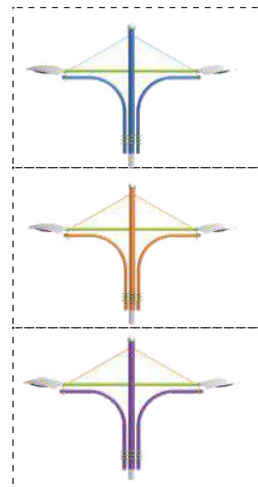

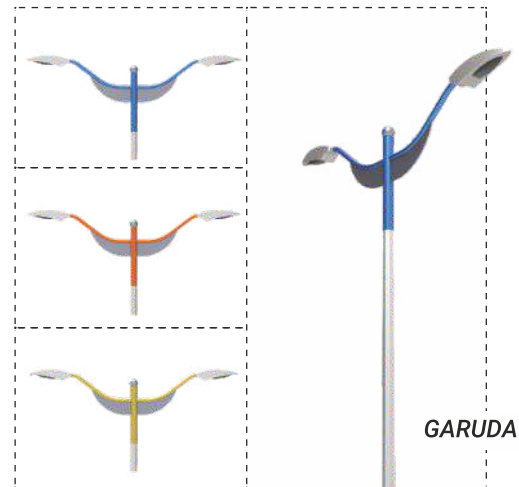

EROS

Valmont India is committed to offer a solution based on customized design as well. Solutions depend on suggestions and guidance from Lighting Designers, Architects and Departments planning to give city a decorative look. Poles can be painted in any color shade using In house Powder Coating facility.

THE PERFECT ACCESSORY FOR ANY STREET

valmont 
STRUCTURES

Valmont® Structures offers a wide range of decorative brackets with unique customised solutions. All our brackets are compatible for mounting over different kinds of poles such as octagonal, conical, square-tapered or polygonal. They are supplied with various arm lengths/overhangs based on customer requirements. Applications include parks, walkways, neighbourhoods and specific area lighting.

VALMONT FACTORIES

The success of Valmont's international facilities in increasing the Indian customer base led to the establishment of a world-class manufacturing plant at the Indapur Industrial Estate, near Pune, Maharashtra, India in 2011 and Panchmahal District in Halol, Gujarat in 2018. With a full-service engineering team located at our headquarters in Magarpatta, Pune, customers can rely on us to develop tailored solutions catering to their specific needs. As a member of the Valmont® global family, Valmont Structures in India is dedicated to the same company-wide values: passion for quality, excellence, integrity and positive results.
